

Downloading Apps on Student iPads

Teachers should submit a Tech Request with the exact name of the app, a link to it from within the App Store, grade level of the students, and general information on student usage.

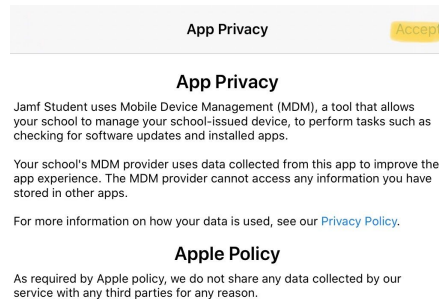

The tech department will examine the security, privacy, and data access the app requires as well as its compliance with state and federal laws. Teachers will be notified via their submitted Tech Request when the app has been approved.

Once you have received notification through your tech request that your app has been approved the app will need to be downloaded to the student iPads. To access approved student apps, students will complete the following steps.

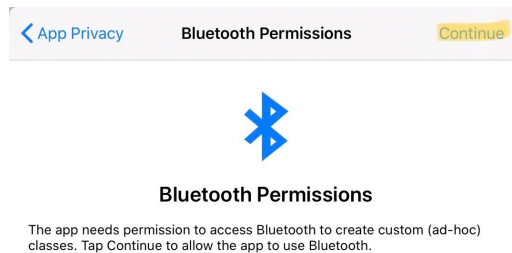

(1) Locate the Student App on the iPad.

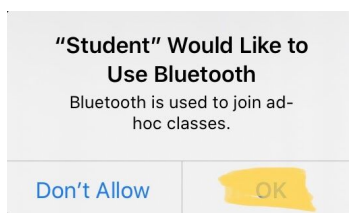

(2) Read and accept the App Privacy Statement

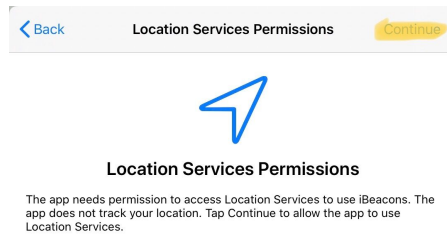

(3) Click continue on the Bluetooth Permissions Screen.

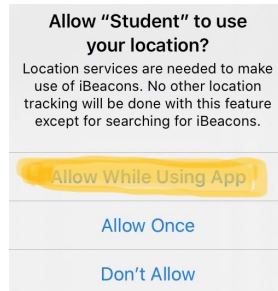

(4) Click OK to allow the app to use Bluetooth.

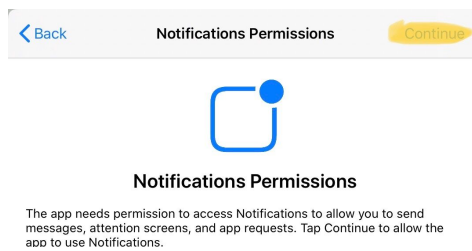

(5) Click Continue on the location services page.

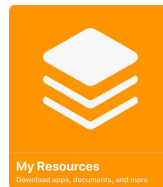

(6) Click Allow While Using App to permit the app to use location services while the app is active.

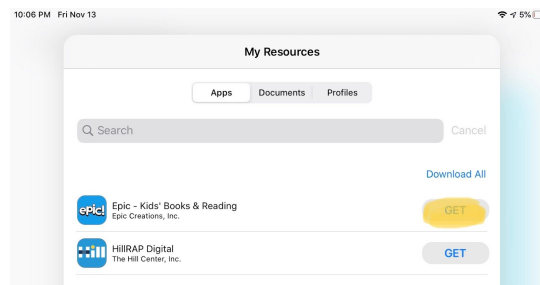

(7) Click Continue on the Notifications Permissions screen.

(8) Click on My Resources.

(9) Click Get beside the app you wish to download.

(10) Exit the student app and allow the app to download. Students can then begin using the app.
